Eli's Extra Practice • week of Oct 17

Name: _____ Date: _____

This week: Lines, segments & rays • Quarters & money • Perimeter • Adding big numbers • Pick the equation

Show your work. For adding, line up the columns. For perimeter, add ALL the sides.

1 What is this called?

- ○ A. line
- ○ B. line segment
- ○ C. ray

2 How many endpoints does a line segment have?

Answer: _____

3 How many endpoints does a line have?

Answer: _____

4 Jake says, "A ray has 2 endpoints because it has 2 ends."
Which answer is right?

- ○ A. A ray has 0 endpoints, just like a line.
- ○ B. Jake is right. A ray has 2 endpoints.
- ○ C. A ray has 1 endpoint. It starts at a dot and goes on forever the other way.

5 How many quarters make $6.00?

Answer: _____

Eli's Extra Practice (continued)

6. Grace needs $4.00 in quarters for the laundry. She has 5 quarters. How many MORE quarters does she need?

   Answer: _____

7. Tom has 18 quarters. How much money is that?

   Answer: $ _____

8. Ava says, "$3.00 is 3 quarters."
   What is her mistake?

   - ○ A. $3.00 is 30 quarters.
   - ○ B. She is right.
   - ○ C. Each dollar is 4 quarters, so $3.00 is 12 quarters.

9. Find the perimeter of the rectangle (in cm).

   Answer: _____

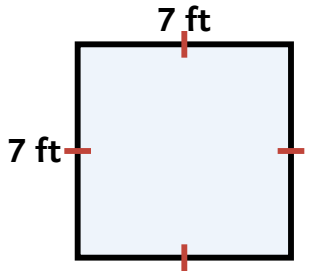

10. All 3 sides are the same length. Find the perimeter (in inches).

   Answer: _____

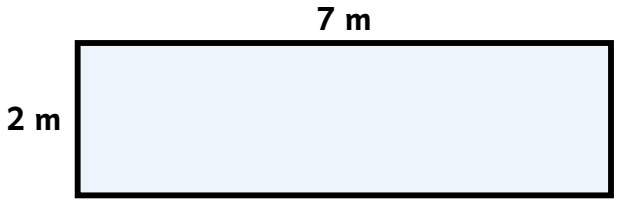

Eli's Extra Practice (continued)

11 A square has sides 7 ft long. What is its perimeter (in feet)?

Answer: _____

12 Liam found the perimeter of a rectangle that is 7 m long and 2 m wide.
He wrote: 7 + 2 = 9 m.
What did he do wrong?

- ○ A. He is right. It is 9 m.
- ○ B. He only added 2 sides. A rectangle has 4 sides: 7 + 2 + 7 + 2 = 18 m.
- ○ C. He should multiply: 7 × 2 = 14 m.

13 56,487 + 27,958 = ?

$$\begin{array}{r} 56{,}487 \\ +\ 27{,}958 \\ \hline \end{array}$$

Answer: _____

Eli's Extra Practice (continued)

14 63,709 + 19,486 = ?

```
  63,709
+ 19,486
```

Answer: _____

15 256 + 318 + 147 + 209 = ?

```
  256
  318
  147
+ 209
```

Answer: _____

16 Estimate by rounding each number to the nearest hundred:
412 + 289 + 506 + 193

Answer: _____

17 Ella has 25 stickers. That is 9 more than Noah.
Which equation fits? (n = Noah's stickers)

- ○ A. n + 9 = 25
- ○ B. 25 + 9 = n
- ○ C. n − 25 = 9

18 Zoe scored 31 points. That is 14 more than Kai.
How many points did Kai score?

Answer: _____

Answer Key (grown-ups)

1. C. ray — Lines, segments & rays
It starts at a point (dot) and the arrow means it keeps going one way forever. That's a ray.

2. 2 — Lines, segments & rays
A segment is a piece of a line with a dot at EACH end: 2 endpoints.

3. 0 — Lines, segments & rays
A line has arrows on BOTH ends. It never stops, so it has 0 endpoints.

4. C. A ray has 1 endpoint. It starts at a dot and goes on forever the other way.
An endpoint is a dot where it STOPS. An arrow means it does not stop.

5. 24 — Quarters & money
4 quarters = $1.00. So 6 dollars = 6 × 4 = 24 quarters.

6. 11 — Quarters & money
First: $4.00 = 4 × 4 = 16 quarters. Then take away what she has: 16 − 5 = 11.

7. $4.50 — Quarters & money
4 quarters = $1. 16 quarters = $4.00, plus 2 more quarters = 50¢. Total $4.50.

8. C. Each dollar is 4 quarters, so $3.00 is 12 quarters. — Quarters & money
A quarter is 25¢. It takes 4 quarters to make one dollar.

9. 28 — Perimeter
A rectangle has 4 sides: 9 + 5 + 9 + 5 = 28 cm.

10. 33 — Perimeter
3 equal sides: 11 + 11 + 11 = 33 in.

11. 28 — Perimeter
A square has 4 equal sides: 7 + 7 + 7 + 7 = 28 ft.

12. B. He only added 2 sides. A rectangle has 4 sides: 7 + 2 + 7 + 2 = 18 m. — Perimeter
Perimeter is the distance all the way around. Count the sides!

13. 84,445 — Adding big numbers
Line up the columns and add from the ones place. Carry when a column makes 10 or more. Estimate first: about 56,000 + 28,000 = 84,000.

14. 83,195 — Adding big numbers
Ones: 9 + 6 = 15, write 5 carry 1. Keep going column by column. Estimate: 64,000 + 19,000 = 83,000.

15. 930 — Adding big numbers
Stack all 4 numbers. Ones: 6+8+7+9 = 30, write 0 carry 3. Tens: 3+5+1+4+0 = 13, write 3 carry 1. Hundreds: 1+2+3+1+2 = 9. Answer 930.

16. 1,400 — Adding big numbers
412 → 400, 289 → 300, 506 → 500, 193 → 200. Then 400 + 300 + 500 + 200 = 1,400.

17. A. n + 9 = 25 — Pick the equation
Noah has FEWER. Noah's stickers plus 9 more make Ella's 25: n + 9 = 25.

18. 17 — Pick the equation
Kai has fewer. k + 14 = 31, so k = 31 − 14 = 17. Check: 17 + 14 = 31 ✓
